Professional Summary

Biomedical data scientist with 5+ years' experience modeling longitudinal data and complex/missing outcomes. Collaborates with senior investigators to assess feasibility and deliver timely, impactful analyses for publication. Currently leading analytics for 3+ studies with pediatric public health surveillance data, located in Pittsburgh, PA.

Highlighted Project Experience

Lead Biostatistician for Study of Viral Circulation in New Vaccine Surveillance Network (NVSN)

September 2024 – Present

- Performed multivariate statistical analysis to assess illness severity and adjusted for suspected correlates, risk factors, and genetic subtypes in children with human Metapneumovirus (MPV).
- Wrote statistical sections of scientific manuscript submitted to journal, received review (under revision).

Design of FDA Protocol for Medical Device Trial

March 2024 – June 2024

- Conducted sample size and power calculations for medical device study based on non-inferiority targets.
- Developed statistical analysis plan (SAP) for FDA Q-submission.

Randomization Scheme for R01 Study in Pulmonology

August 2021 – September 2022

- Designed randomization protocol for study of aspiration in intubated patients, utilizing permuted block schema.

Work Experience

Staff Data Scientist

Children's Hospital of Pittsburgh, Division of Infectious Diseases – Pittsburgh, PA

May 2024 – Present

- Conduct statistical analyses with biomedical datasets to support pediatric public health initiatives.
- Collaborate with cross-functional teams to design clinical studies and interpret data.
- Develop statistical protocols for NIH grant submissions, performing power calculations and sample justifications.
- Present findings to staff and faculty, contributing to publications and medical conferences on infectious disease.

Graduate Research Assistant

Colorado School of Public Health, Department of Biostatistics – Denver, CO

August 2021 – December 2023

- Managed multiple ongoing data analytics projects focused on pulmonology and critical care health outcomes.
- Applied statistical methods and R/Python programming to clean, analyze, and visualize data.
- Co-authored 7+ peer-reviewed publications and presented at industry conferences.

Neuroimaging Data Analyst

University of Pennsylvania, Department of Radiology – Philadelphia, PA

March 2018 – August 2020

- Analyzed high-dimensional imaging data to support research in radiology and neuroscience.
- Built Python package to streamline combination of diverse neuroimaging datasets with clinical information.
- Collaborated with radiologists and neurologists to identify lifespan trends and interpret results.
- Contributed to the development of predictive models of age and dementia for clinical diagnostics.

Education

Doctoral-level coursework: Biomedical Machine Learning, Model Selection, Causal Inference (concurrent).

Master of Science in Biostatistics

University of Colorado Anschutz Medical Campus – Aurora, CO

Graduated: May 2023 (4.0 GPA)

Marvin Porter Award for outstanding academic achievement

Bachelor of Science in Economics

University of Pennsylvania, Wharton School – Philadelphia, PA

Graduated: May 2018 (Magna cum laude)

Skills

- Statistical Programming: R, SAS, Python
- Data Manipulation & Analysis: Regression, longitudinal modeling, survival analysis, causal inference
- Scripting & Automation: Unix Bash, Microsoft Power Automate
- Data Visualization: ggplot2, shiny, matplotlib, Power BI
- Soft Skills: Project Management, Request triage, Statistical Consulting, Scientific communication

Other Relevant Experience

- Maintainer of 'neuroHarmonize' python package (2021-present): pypi.org/project/neuroHarmonize/
- Statistical reviewer for 5 journal articles (2020-present): *Imaging Neuroscience*, *NeuroImage*
- Graduate teaching assistant (Fall 2023): *Analysis of Longitudinal and Survival Data*
- Volunteer: *Humane Animal Rescue of Pittsburgh* (40+ hours), *First Tee of Pittsburgh* (20+ hours)
