EDUCATION

MS, Biostatistics May 2023
University of Colorado–Denver *Thesis: Testing for mean differences in partially matched data*

BS, Economics May 2018
University of Pennsylvania, Wharton School

TECHNICAL SKILLS

Programming: Python (NumPy, Scikit-learn, SciPy, PyTorch, Matplotlib), R (tidyverse, mice, ggplot2), SQL, SAS, Unix shell scripting

ML & AI: Deep learning (CNNs, brain age modeling), supervised/unsupervised ML, LLM-assisted workflows (Claude, GitHub Copilot), image processing, computer vision, Monte Carlo simulation

Statistics: Multivariate regression, GEE, Bayesian analysis, causal inference, propensity scores, survival analysis, longitudinal data, missing data/multiple imputation, sample size/power

Data Infrastructure: SQL, AWS (S3, EC2, IAM), HPC environments (parallel job scheduling), Docker, DBT, REDCap (API automation), Power BI, Git, end-to-end clinical pipeline design

Neuroimaging: FreeSurfer, sMRIPrep, MRIQC, neuroHarmonize (author), ComBat-based harmonization

RESEARCH & PROFESSIONAL EXPERIENCE

Data Scientist / Lead Biostatistician 2024 – Present
University of Pittsburgh / Children’s Hospital of Pittsburgh

- Lead statistician on a **CDC-sponsored New Vaccine Surveillance Network** study; designed and executed the full clinical analytics pipeline across 8,000+ pediatric encounters, from study design through publication.
- Built end-to-end SQL-based data infrastructure integrating multi-system clinical data sources including REDCap, EHR extracts, and laboratory read-outs; developed a Power BI dashboard (ranked 834 of 3,571 UPMC reports) and automated recurring query workflows, saving coordinators 3–4 hours/week.
- Developed and validated **multivariate ML risk-stratification models** (logistic regression, ordinal outcomes) to predict severe respiratory illness in pediatric populations; results informed CDC public health guidance.
- Integrated LLM-assisted workflows (Claude, Copilot) into report drafting, slide narratives, and code generation; mentored junior faculty and fellows, contributing to 3 successful grant proposals and one NIH (K) award.

Independent Statistical Consultant 2023 – 2024
Upwork.com

- Advised medical device clients on **FDA submission study design**; performed sample size and power calculations. Conducted **customer segmentation analysis** for an e-commerce client using clustering methods.

Graduate Research Assistant 2021 – 2023
University of Colorado–Denver, Department of Biostatistics & Informatics

- Co-authored **10+ peer-reviewed manuscripts** across pulmonary medicine, critical care, and clinical epidemiology spanning seven journals; gained exposure to the Premier healthcare database; collaborated with multidisciplinary clinical teams to translate research questions into statistical analyses.
- Completed doctoral-level coursework in **machine learning and model selection**; served as TA for Longitudinal and Survival Analysis.

Data Analyst 2018 – 2020
University of Pennsylvania, School of Medicine — Davatzikos Lab (CBICA)

- Designed and deployed **neuroHarmonize**, a production-grade open-source Python package (100+ GitHub stars, **500+ citations**) for harmonizing multi-site neuroimaging datasets using ComBat-GAM statistical methods; adopted as a standard preprocessing tool by neuroimaging consortia internationally.
- Built automated **ML pipelines for MRI image processing and feature extraction**, reducing preprocessing timelines from months to days for a multi-center neurodegeneration biomarker consortium.
- Applied **deep learning and computer vision** (CNNs) to 14,000+ MRI scans to model brain age trajectories and disentangle neurodegeneration from typical aging; results published in *Brain* and *Alzheimer’s & Dementia*.

AWARDS & HONORS

- Certificate of Appreciation, Centers for Disease Control and Prevention, 2024–2026.
- Marvin Porter Award for Outstanding Academic Achievement, UC Denver Biostatistics, 2023.
- Dean’s List, University of Pennsylvania Wharton School, 2018.
- Hackathon Winner, Ryder Transportation analytics, Wharton Customer Analytics Initiative, 2018.
